

India's Agricultural Crop Production Analysis using Tableau

TEAM ID	SWTID-2026-7349
PROJECT TITLE	India's Agricultural Crop Production Analysis using Tableau
MAX MARKS	2 MARKS

5.2 – Sprint Delivery Plan

Sprint/Activity	Duration	Description
Smart Bridge Live Sessions	18 Days	Attend instructor-led live sessions covering Tableau, data visualization, project guidance, Flask integration, and deployment concepts.
Data Collection	1 Day	Collect the India Agricultural Crop Production dataset (1997–2021) and understand the dataset structure and attributes.
Data Connectivity	1 Day	Connect the dataset to Tableau and verify data import, field types, and relationships.
Data Preparation	1 Day	Clean the dataset, handle missing values, create calculated fields (Yield, Unit Type, Season), and prepare data for visualization.
Dashboard & story Development	1 Day	Design interactive Tableau dashboards and create a Tableau Story presenting key agricultural insights.
Tableau Public Upload	1 Day	Publish the Tableau workbook and Story to Tableau Public and verify accessibility.
Web Integration	2 Days	Develop a Flask-based website using HTML, CSS, and Bootstrap, and embed the Tableau dashboards into the web application.

India's Agricultural Crop Production Analysis using Tableau

Documentation	3 Days	Prepare project documentation, including SRS, methodology, dashboard explanations, testing report, and user guide.
Demo Video Creation	2 Days	Record and edit a demonstration video showcasing the project's features, dashboards, and website functionality.
Project Deployment	2 Days	Deploy the Flask web application, perform final testing, fix issues, and prepare the project for submission.
