

India's Agricultural Crop Production Analysis using Tableau

TEAM ID	SWTID-2026-7349
PROJECT TITLE	India's Agricultural Crop Production Analysis using Tableau
MAX MARKS	3 MARKS

6.3 – Data Preparation

CHART TITLE	CHART TYPE
KPIs – Total Production & Total Yield (2 KPI tiles)	KPI
Trend of Agricultural Yield (1997–2021)	Line Chart
State-wise Agricultural Production Distribution	India Map
Crop-wise Total Production Analysis	Horizontal Bar Chart
State-wise Cultivated Area Comparison	Grouped Bar Chart
Leading States by Agricultural Production	Bar Chart
Year-wise Total Agricultural Production (1997–2021)	Bar Chart
Production Distribution by Unit Type	Donut Chart
Season-wise Agricultural Production Share	Pie Chart

Sheet - 1 - KPIs – Total Production & Total Yield (2 KPI tiles)

STEPS: -

1. Drag **Production** to the **Marks card** and drop it into a **Text Area**
2. Drag **Yield** to the **Marks card** and placed into a **Text Area**
 - Right-click on **SUM(Yield)**
 - Select **Measure** and click drop right arrow
 - Select **Average**
3. In **Marks card** click **Text** and click on three dots '...'
4. After clicking three dots one dialog box appears it is used to **Edit label**
5. Defaultly appears -----> **<SUM(Production)>** and **<AVG(Yield)>** clear it

Total Production	Average Yield
<SUM(Production)>	<AVG(Yield)>
6. Add these two formulae and add bold and increase font size and click apply and ok
7. In Marks card **SUM (production)** click on drop down arrow and click format
 - Choose default click on numbers down arrow
 - Choose **Number custom**
 - Click drop down arrow in **Display units**
 - Select Million
8. In menu bar click on **Format** option click on **Shading**
9. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down arrow
 - Select **light beige color**
10. In menu bar click on **File Menu** option
11. Click on **Save** option to sheet save

Sheet - 2 -Trend of Agricultural Yield (1997–2021)

Steps: -

1. Drag **Year** to columns shelf
2. Drag **Yield** to rows shelf
 - Yield converts into **SUM (yield)**
3. Drag **Year** to the **Marks card** and drop it into **Color Area**
4. Drag **Yield** to the **Marks card** and drop it into **Label**
5. In **Marks card** automatic appears click drop down arrow
6. Select **line**
7. In menu bar click on **Format** option click on **Shading**
8. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down arrow
 - Select **light beige** color
9. In menu bar click on **File Menu** option
10. Click on **Save** option to sheet save

Output: -

Sheet - 3 -State-wise Agricultural Production Distribution

Steps: -

1. Drag **State** and drop it into a **Canvas Area**
2. Tableau automatically creates a map using latitude and longitude
3. Click on automatic drop-down arrow and select **Map**
4. Drag **Production** placed into a **color** and **size** in Marks card
5. Drag **State** to the Marks card and drop it into a **Label**
6. Drag **State** and **Production** drop it into a **Tooltip**
7. In a **Marks card** click on **color** and click **Edit color option**
 - Color palette dialog box appears click automatic drop-down arrow and select **green color**
8. In menu bar click on **File Menu** option
9. Click on **Save** option to sheet save

Output: -

Sheet - 4 -Crop-wise Total Production Analysis

Steps: -

1. Drag **Production** and placed into a Columns shelf
2. Drag **Crop** and placed into a Rows shelf
3. Drag **Crop** and placed into a **color** area in the Marks card
4. Drag **Production** and drop it into a **Label**
5. Drag **Crop** and placed into a **Filters** one dialog box appears
6. In general, all corps have **Check Mark** so click on **None**
 - Click on **Top** in same dialog box
 - Choose **By filed**
 - Top **Right-side** give numeric value 20
7. It displays top 20 crops
8. In menu bar click on **Format** option click on **Shading**
9. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down
 - Select **light beige color**
10. In menu bar click on **File Menu** option
11. Click on **Save** option to sheet save

Sheet - 5 -State-wise Cultivated Area Comparison

Steps: -

1. **State** drags into a Columns shelf
2. Drag **Area** into a Rows shelf
3. Drag **State** and placed into a **Color** in Marks card
4. Drag **State** and placed into a Filters
5. All states display click **None** and to uncheck all states
6. Again, give **check Mark** for following state
 - Uttar Pradesh
 - Madhya Pradesh
 - Maharashtra
 - Rajasthan
 - Karnataka
7. In columns shelf right click on states
8. Click on **short** and select **Descending**
9. In menu bar click on **Format** option click on **Shading**
10. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down
 - Select **light beige color**
11. In menu bar click on **File Menu** option
12. Click on **Save** option to sheet save

Sheet - 6 -Leading States by Agricultural Production

Steps: -

1. Drag **State** and placed into a Columns shelf
2. Drag **Production** into a Rows shelf
3. Drag **State** and placed into a Color in Marks card
4. Drag **State** and placed into a Filters
 - One dialog box appears
 - Click on **None** to uncheck all states
 - Click on top and select **By field**
5. Top **Right-Side** give numeric value 5 and click apply and click ok
6. It displays top agricultural production
7. In menu bar click on **Format** option click on **Shading**
8. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down
 - Select **light beige color**
9. In menu bar click on **File Menu** option
10. Click on **Save** option to sheet save

Sheet - 7 -Year-wise Total Agricultural Production (1997–2021)

Steps: -

1. Drag **year** and placed into a Columns shelf
2. Drag **yield** and placed into a Row shelf
3. Drag **year** and placed I to a color in **Marks card**
4. In menu bar click on **Format** option click on **Shading**
5. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down
 - Select **light beige color**
6. In menu bar click on **File Menu** option
7. Click on **Save** option to sheet save

Output: -

Sheet - 8 -Production Distribution by Unit Type

Steps: -

1. Open the **Analysis menu** and choose **Create Calculated Field**
2. Enter the **Name as Zero** and type the **value 0** then press OK
3. Again, Open the **Analysis menu** and choose **Create Calculated Field**
4. Enter the Name as **Unit Type** and type the formula

IF [Crop] = 'Cotton' THEN 'Bales'

ELSEIF [Crop] = 'Coconut' THEN 'Thousand Nuts'

ELSEIF [Crop] = 'Jute' OR [Crop] = 'Mesta' THEN 'Bales'

ELSE 'Metric Tonnes'

END

5. Then click ok
6. From data drag **Zero** and placed into the Rows shelf
7. In the Marks card, change the chart type from Automatic to **Pie**
8. In **tool bar** click on standard drop down arrow
9. Then click the **Entire View**
10. Adjust the Size slider in the Marks card to enlarge the pie chart
11. Add **Zero** once again to the Rows shelf beside the **first SUM(Zero)** field
12. Right-click the **Second SUM(Zero)** and apply the **Dual Axis** option
13. Select the **Second SUM(Zero)** in Marks card
14. Reduce the chart size slightly and choose **White** as the color
15. In Marks card select **SUM (zero)**
16. Drag **Unit Type** and placed into a color in Marks card
17. Drag **Production** and **Unit Type** and placed into a **Label**
18. In menu bar click on **Format** option click on **Shading**
19. Left side of work space format shading dialog box appears
 - a. Click on default work sheet drop-down

Sheet - 9 -Season-wise Agricultural Production Share

Steps: -

1. Click Automatic drop-down arrow in Marks card
 - Select **pie chart**
2. Drag **Season** and placed into a **Color** in Marks card
3. Drag **Area** and drop it into an **Angel**
4. Drag **Season** and **Production** and drop it into a **Label**
5. In **Tool bar** click on standard drop down arrow then click the **Entire view**
6. In the Marks card right click on **SUM (Production)**
 - Select **Format**
7. Format dialog box appears of left side
 - In default click on numbers down arrow
 - Choose **Number Custom**
 - Click drop down arrow **Display Units**
 - Select **Millions**
8. In menu bar click on **Format** option click on **Shading**
9. Left side of work space format shading dialog box appears
 - Click on default work sheet drop-down
 - Select **light beige color**
10. In menu bar click on **File Menu** option
11. Click on **Save** option to sheet save
